

NEW! FUNGICIDE

BattleLine[®]
FUNGICIDE

Draw the Line. Defend Your Crop.

Protects from the inside out — preventing foliar and root diseases before they spread.

When disease shows up, BattleLine Fungicide gets to work. This proven product delivers reliable preventive control of black root rot, Rhizoctonia, Fusarium, Botrytis, and powdery mildew. Systemic movement protects both sides of the leaf, with flexible applications to fit your program. Long residual control, excellent plant safety, minimal PPE.

Locally Systemic Activity

Protects plant tissue from the inside out to stop disease before it spreads.

Broad Spectrum Disease Control

Controls key foliar and root diseases with one reliable solution.

Flexible Application Methods

Fits seamlessly into greenhouse and nursery programs with multiple application options.

Long Residual Activity

Provides lasting protection and helps reduce repeat applications.

Rotation Program

	Product 1	Product 2	Product 3	Product 4
Botrytis	BattleLine [®] (3)	Decree [®] (17)	Orkestra [®] Intrinsic [®] (7+11)	BotryStop [®] (BM 02)
Black Root Rot	BattleLine [®] (3)	Affirm [®] (19)	3336 [®] (1)	Medallion [®] (12)
Fusarium	BattleLine [®] (3)	Heritage [®] (11)	3336 [®] (1)	Palladium [®] (9+12)
Rhizoctonia	BattleLine [®] (3)	Pageant [®] Intrinsic [®] (7+11)	3336 [®] (1)	Medallion [®] (12)
Leaf Spots	BattleLine [®] (3)	Camelot [®] O (M3)	Daconil [®] (M5)	Broadform [®] (7+11)
Powdery Mildew	BattleLine [®] (3)	Pipron [®] (5)	Mural [®] (7+11)	MilStop [®] (UC)

Draw the Line Against Disease.
Learn why growers trust **BattleLine**[®]
for reliable disease control.

How to Succeed

Strike First. Apply preventively to block infection before it takes hold.

Hit every zone. Target foliage, crowns, and roots with foliar or drench applications for full-coverage defense.

Build the program. Rotate with Camelot® O, Pipron® or Decree® to minimize resistance and increase efficacy.

Hold your ground. Maintain protection with 14-day spray and 2-4 week soil drench intervals.

Rotate for resilience. Alternate with any non-FRAC 3 fungicide to manage resistance.

Barracuda® Quick Facts

Active Ingredients	Triflumizole (42.14%)
Mode of Action (MOA)	FRAC Group 3 - DMI fungicide (sterol biosynthesis inhibitor)
Re-Entry Interval (REI)	12 hours
Pre-Harvest Interval (PHI)	0 day
Personal Protective Equipment (PPE)	Long-sleeved shirt & pants, socks, shoes, chemical-resistant gloves
Formulation	Suspension Concentrate (SC)
Activity	Systemic and contact; preventive and early curative
Application	Foliar spray, soil drench, cutting soak, chemigation, no aerial/drone/ULV
Rate per 100 gallons	2-16 fl oz (see labels for diseases)
Max Applications	Ornamentals: No more than 4 applications per crop per year or 32 fl oz per acre per year Vegetable: No more than 4 applications per crop or 16 fl oz per acre per crop.
Packaging	1 qt bottle (6 per case)
Labeled Use Sites	Greenhouses, shadehouses, nurseries, Christmas tree and conifer plantations, and interiorscape
Labeled Crop Uses	Ornamentals*, Christmas trees, conifers, and greenhouse tomato and cucumber (including transplants)
Target Diseases	Fusarium, black root rot, Cylindrocladium, Rhizoctonia, powdery mildew, rusts, scabs, leaf spot, blights, botrytis
Compatibility	Tank-mix friendly with most fungicides

* Avoid impatiens plugs and follow label for consistent plant safety.
