

NEW! MITICIDE/INSECTICIDE

Barracuda[®]
INSECTICIDE/MITICIDE

One Bite. All Mites.

Dual actives deliver fast knockdown and lasting control, even under leaves where sprays miss.

When pests hide, Barracuda finds them. Built for tough greenhouse and nursery pests like mites and thrips, Barracuda delivers consistent control across life stages with fewer products and fewer steps. One product. All life stages. Reliable control.

Mite & Insect Control

Controls mites at all life stages and controls thrips, aphids, leafminers, whiteflies & more.

Synergistic Modes of Action

Two modes of action work together to deliver consistent, reliable pest control.

Fast Knockdown & Long Residual

Rapid visible control with 28+ day residual performance.

Excellent Crop Safety

SC formulation is designed to be gentler on plants than EC formulations.

Rotation Program

		Product 1	Product 2	Product 3	Product 4
Spider Mites		Barracuda [®] (6+20D)	Akari [®] (21A)	TetraSan [®] (10B)	Sultan [®] (25)
Broad/Cyclamen Mite		Barracuda [®] (6+20D)	Akari [®] (21A)	Savate [®] (23)	Pylon [®] (13) <small>Use hort oil outdoors</small>
Rust/Eriophyid Mite		Barracuda [®] (6+20D)	Akari [®] (21A)	Savate [®] (23)	Pylon [®] (13) <small>Use hort oil outdoors</small>
Thrips		Hachi-Hachi [®] SC (21A)	Barracuda [®] (6+20D)	Mainspring [®] (28)	Conserve [®] (5)
Whiteflies	Neonic	Marathon [®] (4A)	Talus [®] (16)	Barracuda [®] (6+20D)	Mainspring [®] (28)
	Non-neonic	Mainspring [®] (28)	Talus [®] (16)	Barracuda [®] (6+20D)	Altus [®] (4D)
Aphids	Neonic	Marathon [®] (4A)	Hachi-Hachi [®] SC (21A)	Barracuda [®] (6+20D)	Ventigra [®] (9D)
	Non-neonic	Altus [®] (4D)	Hachi-Hachi [®] SC (21A)	Barracuda [®] (6+20D)	Ventigra [®] (9D)
Leafminers	Neonic	Barracuda [®] (6+20D)	Mainspring [®] (28)	Safari [®] (4A)	Conserve [®] (5)
	Non-neonic	Barracuda [®] (6+20D)	Mainspring [®] (28)	Citation [®] (17)	Conserve [®] (5)

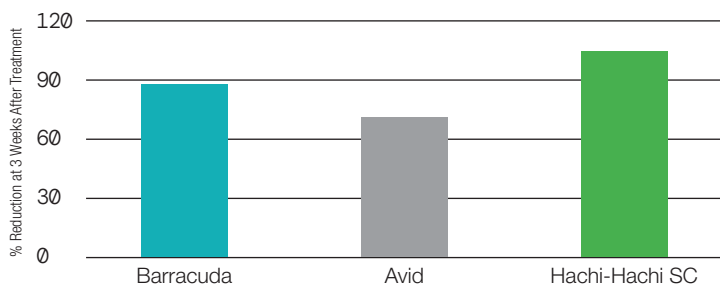

Stay Hidden. Strike Hard.

Discover fast knockdown and extended residual control with **Barracuda**[®].

Aphid Control at 3 Weeks After Treatment.

6 fl oz for Barracuda, 8 fl oz for Avid and 21 fl oz for Hachi-Hachi SC

Source: SEPRO Land 2026

How to Succeed

Apply early. Target the first signs of mites or thrips to prevent population buildup.

Ensure thorough coverage. Uniform leaf coverage is critical for consistent results.

Add a surfactant. Suitable surfactant improves spray coverage and contact and residual efficacy.

Rotate modes of action. Alternate with products like Akari® or Hachi-Hachi® SC to support resistance management.

Follow labeled rates and intervals. Adhere to labeled application rates and intervals for optimal performance.

Reintroduce beneficials after 7 days. Short residual supports a quick return to IPM programs.

Barracuda® Quick Facts

Active Ingredients	Bifenazate (43.2%), Abamectin (2.2%)
Mode of Action (MOA)	Group 20D + 6
Re-Entry Interval (REI)	12 hours
Personal Protective Equipment (PPE)	Long-sleeved shirt and long pants, socks, shoes, apron, chemical-resistant gloves
Formulation	Suspension Concentrate (SC)
Activity	Contact + Translaminar; controls all mite species and life stages (eggs, nymphs, adults)
Application	Foliar spray (backpack, hand, ground sprayer only; no aerial/drone/ULV)
Rate per 100 gallons	3-4 fl oz for mites and 6 fl oz for insects
Rate per 1 gallon	3/16 tsp to 3/8 tsp
Max Applications	2 per crop per year
Packaging	1 pt bottle (6 per case)
Labeled Use Sites	Greenhouses, shadehouses, nurseries, Christmas tree and conifer plantations, exterior and interior landscapes
Pests Controlled	Spider mites (all species), broad and cyclamen mites, rust/eriophyid mites, clover mite, aphids, thrips, whiteflies, leafminers
